

CECS100

Hmw5

Design a program that prompts the user to enter a number within the range of 1 through 10. The program should display the Roman numeral version of that number. If the number is outside the range (1 through 10), the program should display an error message.

Flowchart, tree diagram

Write a java code that show your design.

Indent, prompt, annotate, and add comments.

Include multiple outputs with your code
