

CECS 100

Hmw1

1- Write a history about computers (and programming languages), and describe significant innovations in **hardware and software** technologies used each time, when appropriate include information about the **pioneers responsible** for the discovery. Explain how computers used to help us solve problems in different areas.

2- Draw **a timeline summarizing** your answer.

Submit using the dropbox for Hmw1. A hard copy is due at the beginning of the class meeting on Tuesday.

3- Explain how you would apply problem solving steps to solve an essay assignment (this homework assignment)

Use your own words, don't just copy and paste. Cite your work and images.

Please note that this is a long (time consuming) assignment.

Check for the originality of your essay by clicking on the originality report, modify your writing, upload again and check for the originality report (the lower the better), but remember only the last file uploaded will be kept in the system and graded by your instructor.
